Responsible and Sustainable Sourcing

Responsible and Sustainable sourcing is important to us at Cheese+ and is at the forefront of our procurement policy.

This includes:

Buying British products

Supplying Fair Trade products

Sourcing Farm Assured Meats, Eggs and Dairy Products

Assessing the standards, policies and suitability of our suppliers

Maintaining product identification and traceability

Buying British

We do our best to Buy British products. This extends to purchasing products from local and regional suppliers thereby ensuring food miles are minimised and that we support local farmers and producers and their employees.

Fair Trade Products

Buying Fair Trade food can make a real difference to the lives of people in developing countries. The injection of money into the local economy can not only sustain acceptable living standards but also provide education and health care. In supplying and promoting Fair Trade products such as Drinks and Chocolate, Cheese+ is proud of its contribution to this global initiative.

Sourcing Farm Assured Meats, Eggs and Dairy Products

At Cheese+ we recognise that good animal welfare standards have a direct impact on the quality of the products we sell. By recognising Farm Assurance Schemes and sourcing products from animals reared on audited farms our customers can be confident that we are supporting the need for good animal welfare practices within the supply chain.

Supplier Selection and Monitoring

As part of our supplier due diligence policy we ensure that products are only obtained from manufacturers that are affiliated to, or actively working towards, a recognised international, EEC or UK quality standard. We keep records of supplier self and

external audits and accreditation certificates and ensure that these are regularly reviewed and updated.

Product Identification and Traceability

We take responsibility for ensuring we are able to provide full traceability of products we sell. Our customers can therefore be assured that whatever they buy from us has met all legal food safety and production standards.

We constantly review our position on responsible and sustainable sourcing and will always endeavour to make improvements and make additional responsibly sourced products available to our customers.
